Quality Policy

BP Precision is committed to providing quality products and services including rotary shoulder connection and other similar products for the oil and natural gas industries. BP Precision strives to complying with all applicable legal, customer and technical standards. All personnel are committed to improving the quality management system effectiveness on a continual basis while maintaining customer satisfaction. It is the policy of BP Precision to review the quality objectives annually to ensure continued adherence to safety, technical and other business oriented goals. BP's unique selling proposition (USP) is based on providing machining services through a API Q1 based quality program.

Quality Objectives

- Maintain ISO 9001, API Q1, 7-1 Licenses.
- Ensure TRIR is below the industry average, Target 1.76
- Maintain or increase customer satisfaction index
- Maintain or reduce rework hours

General Manager: Justin Brandstrom
